

MOHAMED ABUPAKKAR SIDDIQE S

Full-Stack SaaS Developer | AI Integration Engineer | Data Integration Specialist

Coimbatore, India • +91 6383306866 • siddiqesq2004@gmail.com • LinkedIn • GitHub • LeetCode • Available for Remote Work

PROFESSIONAL SUMMARY

Results-driven Full-Stack SaaS Developer with hands-on experience designing and deploying cloud-based multi-tenant platforms, AI-powered products, and data integration solutions. Proven ability to translate UI/UX designs and API specs into production-grade web applications. Proficient in React, Node.js, Next.js, Laravel, MySQL, and AWS. Skilled at leveraging AI tools to ship MVPs rapidly. Fluent in English with strong remote communication skills and an NDA-ready professional track record.

TECHNICAL SKILLS

SaaS & Cloud: Multi-Tenant SaaS Architecture, Cloud-Based Web Apps, AWS (Generative AI & Cloud Computing), MVP Development

Languages: JavaScript (ES6+), Python, PHP, Java, C

Frameworks & Libraries: React, Next.js, Node.js, Laravel

Databases: MySQL

Data Integration: REST API Integration, SQL, Data Pipelines, Tableau, Python (Pandas, NumPy)

AI & Automation: LLM Development, AI Agent Development, n8n Workflow Automation, Agentic AI Systems

Tools & Platforms: Git, GitHub, n8n, Arduino, PyCharm

Areas of Interest: Software Development, Cloud Computing & Networking

Languages (Human): English (Fluent), Tamil, Japanese (Read/Write/Speak), Hindi

WORK EXPERIENCE

Software Developer Intern | [RadInfo Tech](#) | Nov 2025 – Present

- Designed, developed, and deployed 6 production SaaS and AI-powered platforms serving real users across education, recruitment, and research.
- Built a multi-tenant School ERP SaaS with subscription management, tenant isolation, and role-based access for administrators, teachers, and students.
- Developed LMS platform for online course delivery and placement training exam modules (live: [internship.rademics.com](#)).
- Built a Conference Management SaaS portal: admins post events; attendees register, pay, and participate — with integrated payment gateway (live: [tarbiat.ac](#)).
- Engineered NeuroHire, an AI recruitment SaaS: companies post jobs; AI evaluates candidates via assessment and conversational interviews on fluency and technical fit (live: [neurohire.rademics.ai](#)).
- Built AI Interview Agent: resume parsing, job-match scoring, and AI-simulated mock interviews with real-time feedback (live: [interview-agent.rademics.ai](#)).
- Developed Research Copilot, an LLM-powered tool assisting researchers in structured academic manuscript creation (live: [copilot.rademics.com](#)).
- Integrated third-party APIs and data pipelines across all platforms; ensured scalability and clean UX aligned with provided UI/UX designs.

Data Science & Analyst Intern | [ZIDIO Development](#) | Aug 2025 – Nov 2025

- Applied Python and industry-standard tools to solve real-world data science problem statements.
- Performed data preprocessing, exploratory data analysis (EDA), and built predictive ML models to deliver actionable insights.

Software & Data Intern | [SakthiLishanth Solar](#) | Jun 2025

- Applied solar monitoring techniques, data analysis workflows, and web development practices to improve internal data visibility.

Data Analyst Intern | [Unified Mentor Pvt. Ltd](#) | Mar 2024 – Jun 2024

- Used Tableau alongside Python to perform end-to-end data analysis and build interactive dashboards.
- Delivered analytical insights to support business decision-making processes.

Data Scientist Training | [Internshala](#) | Dec 2022 – Jan 2023

- Completed structured training in Python for data science, covering data manipulation, visualization, and predictive modeling.

PROJECTS

School ERP – Multi-Tenant SaaS Platform

- Architected a cloud-based SaaS ERP for schools with multi-tenant subscription management, tenant isolation, and role-based access control for administrators, teachers, and students.

NeuroHire – AI Recruitment SaaS Platform — neurohire.rademics.ai

- End-to-end AI hiring platform: companies post jobs; AI assesses candidates via conversational interviews, evaluating fluency, technical answers, and behavioral fit to filter suitable applicants automatically.

LMS Platform – Online Learning & Exam System — internship.rademics.com

- Full LMS supporting course delivery, student progress tracking, and live exam/assessment modules for placement training cohorts.

Interview AI Agent – Resume-to-Job Matching & Mock Interviews — interview-agent.rademics.ai

- AI agent that parses candidate resumes, matches profiles to relevant job listings, and conducts interactive AI-simulated mock interview sessions with real-time feedback.

Research Copilot – AI Manuscript Assistant — copilot.rademics.com

- LLM-powered research tool guiding new researchers through structured academic manuscript creation, citations, and formatting workflows.

Conference Management SaaS Site — tarbiat.ac

- Full-featured conference portal where admins post events and attendees register, pay, and manage participation — with integrated payment gateway and dashboard.

Agentic AI Email Automation (n8n)

- Built an Agentic AI system integrated with a chatbot that automatically generates and sends professionally worded e-commerce email responses via the n8n automation platform.

AI-Driven Autonomous Vehicle Simulation Software

- Engineered an AI-driven simulation platform recreating realistic driving environments, sensor inputs, and intelligent agent behaviors to accelerate AV development, testing, and safety validation.

Product Website Development (Amazon Clone)

- Developed a full-stack e-commerce website replicating Amazon's core functionality: product listings, search, filtering, and a responsive UI with strong focus on UI/UX design and database management.

Voice Controlled Robot Using Arduino

- Designed and built a voice-controlled robot that processes audio input via speech recognition to enable hands-free, command-driven movement — winner of Project Expo First Prize, SNSCT.

Vision Bot – Hand Gesture Controlled Robot

- Developed a hand gesture-controlled robot using sensor-based movement interpretation, integrating embedded systems and wireless communication for real-time seamless control.

Line Follower Robot with Obstacle Detection

- Built an autonomous line-following robot with obstacle detection to assist differently-abled individuals in safe and efficient navigation.

EDUCATION

B.E. Mechatronics Engineering — SNS College of Technology | 2022 – 2026 | CGPA: 8.7 / 10

HSC (Class XII) — National Public School, Namakkal | 80% **SSLC (Class X)** — National Public School, Namakkal | 75%

CERTIFICATIONS

- AWS – Generative AI & Cloud Computing
- Full Stack Development Certification
- Python – Programming Certification
- C – Programming Certification
- SQL – Database Certification
- C++ (CPP) and 7+ MOOC Courses
- NPTEL – Rapid Manufacturing (Score: 72%)

ACHIEVEMENTS & PARTICIPATION

- Project Expo – First Prize (Voice Controlled Robot, SNSCT)
- Vision Bot – First Prize (DSCE Competition)
- Smart India Hackathon 2024 – Participant
- Unstop: Ideathon – AI & ML (2023)
- Unstop: Code Golf – IIT Jodhpur (2025)
- Workshop: Vision Bot – NIT Trichy (2023)

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

- Active Member – Youth United Council of India (YUCI)
- Active Member – Red Ribbon Club (RRC); organized Blood Donation Camp with RRC
- Active Member – Random Acts of Kindness (RAC)
- Active Member – Institution of Electronics & Telecommunication Engineers (IETE)
- Conducted a Bootcamp in School
- Promoted Voting Awareness through Rotaract Club
- Led several socially responsible events through IETE Forum and Rotaract Club
